

RAJAA MOUTIQ

PROFILE

With my master's degree in finance, I worked as a relationship banker. However, I successfully transitioned into the field of web development after a dedicated journey of continuous learning. My background in Finance had not only honed my analytical and problem-solving skills but also strengthened my logical thinking abilities. This logical mindset translates into my work as a web developer, enabling me to identify efficient solutions, optimize code and create intuitive user experiences. Please visit my LinkedIn profile to discover my portfolio!
